

Kiran Gunturu

Senior Data Engineer

 Charlotte, United States, 28104

 (603) 218-9086

 Kiran.gntdm@gmail.com

Organized and dependable candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals.

Skills

Hadoop Data Ingestion using ETL Tools (Pyspark, Sqoop)

Database (Oracle, Hive, Microsoft SQL Server)

Unix Shell Scripting, Python

Informatica Power Center 10.5, IICS

Amazon Web Services (Glue, Athena, Boto3, Redshift, SQS, S3, Lambda, Cloud Watch, Secrets Manager, EMR)

Jira, Putty, ServiceNow, Confluence, Toad, SQL Developer

Version Control (SVN, Bit Bucket)

SnowFlake

Scheduling (Active Batch, Oozie)

File Systems (HDFS, Orc, Avro, Parquet)

Spark & Hive Optimization

Dimensional Modelling - Schema Designing

Work History

Senior Data Engineer

Nissan North America, Inc., Franklin, TN

- Extensively used PySpark UDFs and pandas to process and transform Data. Developed PySpark programs to perform data transformations, creating data frames and running SparkSQL.
- Established coding and design strategies to optimize long running spark jobs.
- Experience with Hive SQL and optimization techniques to improve data processing and retrieving. Used Hive Partitioning and bucketing to optimize performance.
- Experience in working Sqoop scripts to ingest data from HDFS to RDBMS and from RDBMS to Hive.
- Handled Different file systems as source and ingested data into Hive.
- Developed Several Informatica mappings, workflows to ingest data to Oracle.
- Developed Data Ingestion framework to load the survey and transaction data from snowflake to apache hive using spark jdbc.
- Developed AWS Lambda functions in Python to process and load messages from AWS SQS to S3.

2019-08 - Current

2018-11 - 2019-08

- Experience in working closely with Data Scientists to make Machine Learning code production ready.
- Experience in loading the data from AWS S3 to Snowflake.

Senior Informatica Developer

Cigna, Nashville, TN

- Involved in business requirement analysis, architectural design, planning, logic design, Project orchestration and development
- Worked extensively on Informatica Power in building ETL process to load Data marts
- Worked with different transformations, worklets and maplets and worked on performance tuning for Informatica workflows and mappings.
- Implemented different Informatica mappings to support data loads like SCD-2 and Delta loads.
- Extracted data from flat files and other RDBMS databases into staging area and populated onto Data warehouse.
- Maintained stored Procedure definitions, transformation rules and targets definitions using Informatica repository Manager.
- Used various transformations like Filter, Expression, Sequence Generator, Update Strategy, Joiner, Stored Procedure, and Union to develop robust mappings in Informatica Designer.
- Developed mapping parameters and variables to support SQL override.
- Created maplets to use them in different mappings.
- Developed mappings to load into staging tables and then to Dimensions and Facts.

2016-05 - 2018-10

Senior Informatica Developer

Fiserv, Omaha, NE

- Designed, Developed and Test ETL Mappings, Maplets, Workflows, Worklets using Informatica Power center 9.x
- Worked in fast paced environment, under minimal supervision providing technical guidance to team members
- Responsible for database schema design, extensive T-SQL development, integration testing and other projects that may be necessary to help team achieve their goals
- Working closely with Onshore and offshore application development leads
- ETL Mappings, Maplets, Workflows, Worklets using Informatica Power center 9.x
- Identify efficiencies and ways to improve design and development processes
- Identify ways to increase efficiency of production support - Find solutions that allow operations to better do their job without involving development resource time
- Performed various test cases to validate pre and post loads.

2012-05 - 2014-12

Informatica Developer

Xilinx, Bangalore, India

- Involved in requirements gathering and complete life cycle of project.
- Worked on Informatica client tools - source analyzer, warehouse designer, transformation developer, mapping designer, workflow designer and task developer.
- Experience in loading data into different targets from various source systems like Oracle database, flat files, xml files etc. Into staging table and then to target database.
- Developed shell scripts to support data load using Informatica Power Center.
- Improved performance to several long running jobs in production
- Extensively used several transformations in power center to transform data to implement all business logics.

2015-01 - 2016-04

Education

Master of Science: Information Technology

Southern New Hampshire University - Hooksett, NH

2021-01

Certifications

AWS Certified Solutions Architect Professional
(https://www.credly.com/badges/53bb8a9a-5a9f-4cca-aea1-e8cb6e002590/public_url)

2022-01

SnowPro Core Certification - SnowFlake
(https://www.credly.com/badges/358f27cd-b93c-4571-b29f-38d68cb24e7f/public_url)

2022-07

SQL Advanced - HackerRank
(<https://www.hackerrank.com/certificates/a7e326db7110>)

Accomplishments

Q4 JDC Group - Nashville Consultant of the Quarter.
