RE: Kiran Kumar Gunturu

Dear Sir or Madam:

Kiran Kumar Gunturu is not an employee of Nissan North America, Inc. This letter serves to affirm that Kiran Kumar Gunturu is an employee of Raven Software Solutions Inc. he is assigned to work at his home office location: 1011 Kalli Drive, Stallings, NC 28104 as a Senior Data Engineer for ongoing work.

His current roles responsibilities including but not limited to:

1. Participate in Requirement Gathering phase of SDLC with System Analyst and work within the Agile - Scrum Methodologies.
2. Develop AWS modules to support file encryption process in S3 buckets.
3. Adhere to standard Principles of Development following enterprise guidelines.
4. Use Jira for story tracking and updates, as part of the agile Framework.
5. Create Power shell Scripts to automate the data load process within data warehouse Team.
6. Conduct a thorough code review and ensure that the outcome is in line with the Objective and all the processes and standards are followed.
7. Work with Functional team to make sure required data has been extracted and loaded and performed the Unit Testing and fixing the errors to meet the requirements.
8. Develop spark streaming Pyspark code to extract real time data from Kafka producers
9. Involve in migration projects to **migrate the data** from Various Source Databases like Oracle and file systems to big data environment.
10. Implement oracle Stored Procedures to make use of them In Informatica Mappings In order to achieve better performance.
11. Implement python and Pyspark scripts for getting data from various source systems to Data Warehouse and big data environment.
12. Convert R programming code to Pyspark to speed up the data ingestion process to big data systems.
13. Responsible for design and develop the data transformations for source system data extraction; data staging, movement and aggregation; information and analytics delivery; and data quality handling, system testing, performance tuning.

14. Extensively used Pyspark UDFs and pandas to process and transform Data. Developed Pyspark programs to perform data transformations, creating data frames and running SparkSQL.
15. Established coding and design strategies to optimize long running spark jobs.
16. Experience with Hive SQL and optimization techniques to improve data processing and retrieving. Used Hive Partitioning and bucketing to optimize performance.
17. Experience in working Sqoop scripts to ingest data from HDFS to RDBMS and from RDBMS to Hive.
18. Handled Different file systems as source and ingested data into Hive.
19. Developed Several Informatica mappings, workflows to ingest data to Oracle.
20. Developed Data Ingestion framework to load the survey and transaction data from snowflake to apache hive using spark JDBC.
21. Developed AWS Lambda functions in Python to process and load messages from AWS SQS to S3.
22. Experience in working closely with Data Scientists to make Machine Learning code production ready.
23. Experience in loading the data from AWS S3 to Snowflake.
24. Develop performance indexes strategy to avoid latency in generating the reports based of huge data volumes.

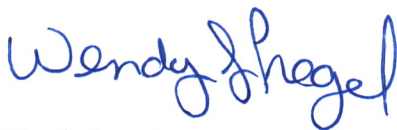

The aforementioned duties require at least a bachelor's degree in Computer Science, Engineering, or related or equivalent degree.

Although the beneficiary, Kiran Kumar Gunturu, is supporting Nissan North America's project, Raven Software Solutions Inc retains the sole authority to control Kiran Kumar Gunturu's work activities. Raven Software Solutions Inc is responsible for paying the salary, benefits, and expenses of Kiran Kumar Gunturu, as well as, maintaining the right to control the hiring of assistance (if needed) and the right to hire or fire. Further, Raven Software Solutions Inc, at all times, maintains and exercises the sole right to control and supervise Kiran Kumar Gunturu's work at Nissan North America, Inc.

The work being done at the Nissan North America, Inc. is ongoing, and in understanding of the continuing nature of the project, we anticipate that Kiran Kumar Gunturu will be needed to perform the above duties for a long duration.

If you have any questions or need further information regarding the matter, please feel free to contact us.

Sincerely,

Wendy Pregel
Senior Vendor Manager
Information Systems
Nissan North America, Inc.
